Client Services

The **Community Living Program** includes nine homes called Alternative Living Units (ALU). Each ALU is integrated within the community and is occupied by three adults with intellectual and other disabilities who are supervised by two live-in managers.

The **Apartment Program** creates an independent, private living environment for people with intellectual and other disabilities who are higher-functioning. It provides 24 hours a day, seven days a week on-site supervision. The majority of these individuals have jobs in the community and engage in community activities, but require assistance with transportation, financial needs and other daily living skills.

The **Personal Supports Program** services are designed for individuals living in the community. Participants live with family or independently in apartments or condominiums. CSLA/Personal Supports services are designed to promote independence in the community. Staff persons are available to assist participants with most daily needs. Typical staff duties include; assistance with chores, cooking, groceries, money management and transportation to and from activities.

The **Day Habilitation and Supported Employment Programs** focus on individualized job training, job placement, and job coaching for both volunteer and competitive employment in the community. Target's Vocational Education Center supplements each client's occupational progression with vocational skills training classes, daily living skills practice, and academic curriculum.

Target conducts Quality Enhancement reviews within a broad range of residential and vocational programs. These reviews involve teams of individuals from the programs that include parents and/or advocates. They are designed to evaluate program compliance as well as the quality of services being provided to individuals.

The Individual Plan

Every client has an Individual Team Meeting (ITM). At the ITM meeting, an Individual Plan (IP) is created. The IP describes your needs, goals and the services that will help you meet your goals. Target will help you make decisions concerning your services.

Following the first 30 days after beginning a particular service, we will collaborate with your team and write your first IP plan that will assess and address your needs.

Your support staff, manager or supervisor should offer you a range of services designed to meet your needs. If you approve, these are developed into an Individual Plan (IP) that outlines what services you will receive. Semi-annual reviews are conducted at least every six months to measure your success and determine your needs. Target will review and update your IP with you and your family every year during your annual ITM. This is a time to discuss your needs and a time to make goals for your future. You can ask to revise your IP at any time.
